

Greetings!

My name is Cameron Landers. I'm a senior level software engineer and technologist with experience that spans multiple platforms, programming languages, technologies and application domains.

I have been operating my own lab as an independent contractor since 2013, providing object-oriented programming and web development services, as well as a range of design services, audio/video engineering and content writing services.

My prior experience includes the above activities, as well as OEM enabling and managing globally dispersed teams of software engineers and technologists.

My history includes several stints with Intel Corporation wherein my many roles included working directly with top platform OEMs: HP, Dell, Lenovo, Apple, Microsoft and others, evangelizing design wins for emerging technologies and managing engineering teams that delivered, supported and sustained those technologies and capabilities.

The list below covers a range of my top skill sets and some of the more diverse aspects of my experience:

Technical Skill Sets:

- **Object Oriented Programming:** Primarily C#, Python and some others.
- **Web Development:** ASP.NET, MVC, HTML5, JavaScript/Typescript, jQuery, CSS3, Bootstrap, Angular, Node.js.
- **REST Services and APIs,** ASP.NET Web API2, Python/FastAPI
- **Database Design:** Transact SQL, tables, views, joins, stored procedures, etc.
- **Databases:** Microsoft SQL Server, Oracle, MySQL, SQLite and some others.
- **IDEs:** Microsoft Visual Studio, Visual Studio Code, Eclipse, XCode.
- **Operating Systems:** Windows, MacOS, Unix, Linux
- **Version Control:** GIT, TFS
- **Design Skills:** Graphics, Animation, UI Design, User Experience (Usage models/Use Cases)
- **IT Skills:** Windows services, enterprise IT applications, PowerShell cmdlets, Group Policy, DNS, TCP/IP, LDAP, Active Directory

- **Information Security:** Encryption, Single Sign-On, SSL certificates, SSH, RDP, VMs, VPNs.
- **Video Engineering:** Production and editing of demos, advertisements, instructional videos, themes and transitions.
- **Audio Engineering:** Multitrack recording, mixing, mastering, voiceover, music arranging, backing tracks, special effects, etc.

Management and Leadership:

- Managing remote, globally dispersed teams of Software Engineers.
- Team building, mentoring, establishing strategy/direction, managing to schedule, exceeding program level commitments.
- Requirements analysis, stakeholder management, Agile practices
- Full team design reviews, feedback-based continuous improvement
- Customer Engagements: Early adopter pilots, executive level OEM presentations.

Additional Skills:

- Communication skills at all levels: non-technical audiences, engineers, executives.
- Presentation/Training Skills: I was a Microsoft Certified Trainer earlier in my career.
- Writing Skills: documentation, design specifications, whitepapers, contracts, patent disclosures, corporate messaging, advertisements, press releases and website content of all kinds.
